## *Kitchen Remodeling Made Easy*

### **You Can Create the Kitchen of Your Dreams**

**I**f you're looking for a turnkey, top-quality contractor, then you've found the team of craftsmen to do your job!

OCContractor will give you a beautifully affordable, quality, and turnkey kitchen because we work only one job at a time. We work your job every day, Monday through Friday, until it is finished. Only then do we leave and begin a new project.

The kitchen you get from us isn't pulled off the shelf in boxes to be put together. We take the time to meet with you in your home, measure the space for your kitchen, and build cabinets suited to your requirements. This ensures maximum use of your space and creates functional

designs to meet your needs. Since we *work one job at a time*, the average kitchen takes about 2 weeks!

In addition to designing the perfect kitchen floor plan, we will help you select wood species, stain color, finish options, door and drawer front style, counter-top material and colors, plumbing fixtures, electrical lighting, switches, and plugs.

Whatever your design requirements, we would love to sit down with you and put together a plan that works for you and your family.

Getting started is as easy as sending an email or making a phone call. We are a team of licensed, professional craftsmen with

over 30 years of trade experience. We operate at the highest level of expertise and perform with conscious quality from our first meeting with you, until the last skilled task is completed. We are a family operated business with an unblemished reputation throughout Orange County.

"We guarantee our craftsmanship." Our pride in a job well done motivates us to pass on this guarantee to all of our clients.
